The Magic of
Disney
is Brilliant

LED Technology

A Disney first

Disney are bringing innovation to our children's lighting by launching our first range of LED table lamps.

A safer solution for children

Unlike LED's, CFL light bulbs (Energy Saving) contain mercury and emit ultraviolet (UV) radiation. They are difficult to dispose of and release hazardous chemicals if broken. They are also 50% less efficient than LED's.

LED COLOUR RANGE

Cool White:	Shade of white with an underlying blue tone
Natural White:	A natural light that mimics daylight
Warm White:	The most popular colour and the closest colour to that given off by traditional light bulbs

Technologie LED

Une première Disney

Disney innove avec la toute première gamme de lampes de table entièrement LED pour les enfants.

Une sécurité pour les enfants

A la différence des LED, les lampes CFL (Economie d'énergie) contiennent du mercure et émettent des radiations (UV).

Gamme de couleur des LED

Blanc froid:	Une lumière blanche avec une touche de bleu primaire
Lumière du jour:	Une lumière qui se rapproche de la lumière du jour
Blanc chaud:	La couleur la plus populaire et également celle qui se rapproche le plus de la lumière émise par les lampes traditionnelles

New LED table lamp (Using Warm White LED) / Neue LED Tischleuchte (mit warmweißem LED)

Nouvelle lampe de Lampe de table LED (blanc chaud) / Nuova lampada da tavolo a LED (con LED Warm White)

*Selection of the designs available / Produktbeispiele
designs disponibles / Selezioni dei design disponibili*

LED Technologie

Die Tischleuchte mit LED-Technik

Disney entwickelt die ersten LED-Kinderleuchten und garantiert damit höchste Sicherheit für Kinder.

Eine sichere Lösung für unsere Kinder

Im Gegensatz zu Energiesparleuchtmitteln enthalten LEDs kein Quecksilber und erzeugen keine ultravioletten Strahlen. Bei der Entsorgung von Energiesparleuchtmitteln treten oft Probleme auf, vor allem bei beschädigten Leuchtmitteln, da gefährliche Stoffe ausströmen könnten. Zu alledem sind die Energiesparleuchtmittel 50% weniger effizient als eine LED. Darüber hinaus entwickelt die LED fast keine Hitze und kommt mit einem Stromverbrauch von 0,72 Watt aus. Damit sind Disney Tischleuchten mit LED-Technik auch als Nachtlicht hervorragend geeignet.

LED FARBSPEKTRUM

kaltweiß:	Weißer Schein mit einem leichten Blauschimmer
natürliches weiß:	Ein natürliches Licht das Tageslicht imitiert
warmweiß:	Die bekannteste und ähnlichste Lichtfarbe zur traditionellen Glühbirne

Tecnologia LED

Una prima Disney

La Disney porta l'innovazione nell'illuminazione per bambini lanciando la prima gamma di lampade da comodino a LED.

Una soluzione più sicura per i bambini

A differenza dei LED, le lampadine fluorescenti (a basso consumo) contengono mercurio ed emettono radiazioni ultraviolette (UV). Sono difficili da smaltire e rilasciano sostanze chimiche pericolose se rotte. Hanno anche un'efficienza pari al 50% di quella dei LED.

GAMMA DI COLORI LED

bianco freddo :	sfumatura di bianco su un tono sottostante blu
bianco naturale:	luce naturale che imita quella diurna
bianco panna:	il colore più comune e più simile a quello emesso dalle lampadine tradizionali
